

Thanks to the revolutionary advancements in laser technology, Dream Spa Medical has the power to rid you of unwanted tattoos in significantly fewer treatments, as compared to other lasers. Our Enlighten laser by Cutera works on a dual-platform, offering pico AND nano technology that will quickly rid you of what you would like to forget.

The de-inking process has progressed from hopeful to fast, safe and effective. Finally, that regrettable tattoo can become forgotten with the most progressive laser tattoo removal technology available in the market—And we are proud to be the first, and one of the few, in Massachusetts to offer it to you.

Traditional Nano seconds hammer away at dense, dull ink. The Pico second platform allows us to fine tune the treatment and clear out stubborn, tricky ink, such as color and shadow work. The precise hand-piece allows us to offer detailed corrections, full clearing, or fading for future artwork and cover-ups.

PRE-TREATMENT

- Do not use self-tanners for *2 weeks* prior to your appointment.
- Avoid sun exposure & tanning beds *4 weeks* prior to your appointment.
- Avoid active ingredients such as acids, astringents, retinals or topical prescriptions *4 days* prior to your appointment.
- Please inform us of any medications: *antibiotics, anticoagulants & Accutane may affect the results of your treatment.*

POST-TREATMENT

- Mild to moderate redness and swelling can be expected. This typically subsides in *2-24 hours*.
- Pinpoint bleeding and blisters may develop. This is a normal clinical reaction.
- Apply Neosporin or Bacitracin until the skin is healed.
- Cool compresses can be used to reduce skin temperature.
- Advil or Motrin can be taken for discomfort.
- Neosporin or Bacitracin can be used for skin sensitivity *24 hours* after your treatment.
- Avoid active ingredients such as acids, astringents, retinals or topical prescriptions for *5 days*.
- Avoid extreme heat such as exercise, hot tubs, saunas & spa treatments for *2 days*.
- Avoid waxing, bleaching or depilatory use on treatment area until the skin is healed.
- Avoid sun exposure & tanning beds for *4 weeks*.
- Use a minimum SPF 30 sunscreen when sun exposure is unavoidable.
- Use a gentle cleanse.
- Cover and protect the treatment area.

PLEASE NOTE

Immediately after the treatment, the treated area will have a frosted appearance. This will develop into a scab or crust. Apply basic wound care, by keeping the area clean, moist and protected. Allow the scab to slough off naturally.
